

Teyana Raubenheimer

MULTIMEDIA APPLICATIONS STUDENT

Personal Information

Address: Cape Town, South Africa

Phone: 078 117 7830

Personal email: teyanaraubenheimer18@gmail.com

Student email: 230237622@mycput.ac.za

Profile

I have completed a Diploma in ICT: Applications Development and am currently studying towards an Advanced Diploma in ICT: Multimedia Applications. My background combines application development with a growing focus on UI/UX design and front-end development. I have experience working with Java, HTML, CSS, JavaScript, React, and Figma, including developing interfaces for web and mobile applications during my internship and working on interface designs as part of my studies and projects.

I have become particularly interested in the relationship between design and development, especially how layouts, navigation, and visual elements can affect how easily users understand and interact with an application. I enjoy working on the design and front-end aspects of applications while having an understanding of the development required to implement them.

I work well independently and as part of a team, take responsibility for my tasks, and manage my time around deadlines. I am continuing to develop my UI/UX skills and would like to build on my experience in Figma and front-end development in a role where I can contribute to creating practical and user-focused digital experiences.

Work Experience

Student Registration Assistant

Cape Peninsula University of Technology | Jan 2026 – Feb 2026

- Assisted new and returning students with the registration process.
- Guided students through online registration portals.
- Provided information on university policies, deadlines, and academic requirements.
- Assisted faculty officers with office tasks, including filing, organizing documents and handling inquiries.
- Helped coordinate student flow during busy periods.
- Maintained a friendly and professional attitude.

Junior Software Developer (Intern)

Plum Systems, Bellville | Jan 2025 – Dec 2025

- Developed and maintained web and mobile application interfaces using React.
- Implemented UI components and features based on project requirements and provided designs.
- Assisted in developing responsive web pages for different screen sizes and devices.
- Worked with team members to improve the usability and presentation of application interfaces.
- Used GitLab for version control, including branching, commits, merge requests, and code reviews.
- Worked in an Agile team environment, contributing to daily updates and task tracking.

Education

Tertiary Education:

Cape Peninsula University of Technology

2026 – Present

Advanced Diploma in ICT: Multimedia Applications

Cape Peninsula University of Technology

2023 – 2025

Diploma in ICT: Applications Development

Secondary Education:

Belhar High School

2022

National Senior Certificate

Hard Skills

- UI/UX & Design:
 - Figma
 - UI design
 - Wireframing and prototyping
 - User interface layout and design
 - Responsive design principles
 - Multimedia applications
- Programming Languages: Java, HTML, CSS, JavaScript
- Web Development: React, responsive web development, front-end development
- Software Development: Application development, UI implementation, problem-solving, working with software requirements
- Version Control: Git, GitHub, GitLab
- Development Practices: Agile/Scrum, collaborative development, code reviews

- Productivity & Documentation:
 - Microsoft Word – technical and project documentation
 - Microsoft PowerPoint – professional presentations and academic reports
 - Microsoft Excel – data entry, basic formulas, tables, and data organization

Soft Skills

- Problem-Solving: Assisted with resolving registration and application-related issues and worked through technical challenges during development projects.
- Communication: Assisted students with queries in a university office environment and collaborated with team members during software development projects.
- Teamwork: Worked as part of development teams and contributed to group academic projects.
- Organization & Time Management: Managed academic assignments, development projects, and work responsibilities while working towards deadlines.
- Adaptability: Adapted to different projects, technologies, and working environments during studies and internship experience.
- Attention to Detail: Worked with application interfaces, documentation, student information, and administrative tasks where accuracy was important.
